1. Claims 1-8 are presented for examination.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The drawings filed on 6/13/04 are acceptable by the examiner. However, direct any inquiries concerning drawing review by the USPTO draftsman to the Drawing Review Branch at (703) 305-8404.
4. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. The added limitation of the claim is already present in parent claim 6. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form.
5. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification. Furthermore, all claims should be revised carefully to eliminate all grammatical errors and antecedent basis problems.
6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless –  
  
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
7. Claims 1-7 are rejected under 35 U.S.C. § 102(e) as being anticipated by US Patent 6,927,991 granted to Perroni et al.

As per claim 1, the reference of Perroni et al. teaches "receiving an input signal comprising a memory flag" in col. 3, lines 55-60 and "accessing data from the LPC

Art Unit: 2111

memory or the firmware memory according to the memory flag” in Fig. 4 and col. 4, lines 32-35.

As per claim 2, the reference of Perroni et al. teaches, “wherein the input signal further comprises an accessing address and an accessing flag” in Fig. 5 and col. 4, lines 55-63.

As per claims 3 and 4, the reference of Perroni et al. teaches the added limitations of the claims in Fig. 5 and col. 4, lines 32-63.

As per claim 5, the reference of Perroni et al. teaches, “... resetting all previous instructions” in Fig. 4, element “RESET” and col. 4, lines 12-16.

As per claims 6 and 7, the claims recite apparatuses. However, the limitations are parallel to the limitations of method claims 1 and 2 respectively. In teaching the construction and use of the device, US Patent 6,927,991 granted to Perroni et al. teaches corresponding apparatuses. Furthermore, the reference of Perroni et al. teaches “read or write operation” in col. 4, lines 5-11.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is urged to consider the references. However, the references should be evaluated by what they suggest to one versed in the art, rather than by their specific disclosure.

Applicants are reminded that each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in 37 CFR 1.56.
